PROFILE

Gloria is a highly motivated entry-level analyst seeking a full-time position to develop her talent specializing in Cyber Security. Her aspiration is not only to represent Asian American women in the tech space, but to also maintain security measures, mitigate risks, and protect the livelihoods and privacy of organizations and people. She possesses a background with 6+ years of Marketing Communications and Customer Service experience, and 1 year of Web Development. She is currently enrolled in Google's Cyber Security Certificate Program and will complete her certification in October 2023.

TECH EXPERIENCE

PROJECT 1: INTERACTIVE FRONT-END APPLICATION PROJECT ITAKEOFF | JANUARY 2023

- Collaborated with a team of 5 to create a job explorer website called iTakeoff designed for people who are new to tech and would like to learn more about the most popular jobs in the industry.
- Utilized bulma CSS framework to create a visually pleasing web application interface and contributed to several bug fixes which led to an improved user experience.

PROJECT 2: INTERACTIVE FULL-STACK PROJECT NOMAD | MARCH 2023

- Participated with a team of 4 to create a website called Nomad that contains top list of previously reviewed cities based on review criterias. Users are able to create a username to login and create reviews.
- Designed the UI using handlebars and assisted with back-end development by adding a technology called Spectre, a css library that includes a special user avatar feature.

PROJECT 3: INTERACTIVE MERN SPA PROJECT KAYUU | MAY 2023

- Cooperated with a team of 5 to create an online store called Kayuu that is intended for customers looking to purchase furniture and other items for their homes.
- Performed testing and other development of front-end features for the application in React.
